“No smart job is ever done without a lunatic.” – Emerik Blum

INTRO

 Before learning more about our extensive collection of Patio Umbrellas, please allow us to acquaint you with the passion that has accompanied each of our products since 1985. It is a project created to offer a perfect combination of innovative and refined forms, sophisticated and quality materials and workmanship, as well as practicality of use. Our wide range of models are designed to adapt to the individual characteristics of each space and protect against sun and rain, whilst completing and enhancing them.

Double Pulley

Low Winch

High Winch (Anti-vandalic)

Telescopic

360° Rotation

180° Rotation

Base included

Ground anchor

Wall bracket

Strong wind resistance

SPLIT ® SOLUTION

Every Heavy Duty Patio Umbrella is produced with a lifted valve, a small frame on top of the canopy that provides better resistance to sudden gusts of wind. In windy areas it is possible to apply the SPLIT ® SOLUTION construction technique, for larger models (4x4m and above). The SPLIT ® SOLUTION is a patented anti-wind system with six overlapping fabrics stripes that help put an end to the 'sail effect' caused by wind against the canopy. The waterproof characteristics of the fabric of the umbrella remain but improved air circulation enhances the shade during hot summer days. The sophisticated design gives the exclusive umbrellas a refined look and enhances their primary function as an essential accessory for the best outdoor spaces.

QUALITY

Over thirty years of experience and numerous patents of umbrellas allows us to offer a two-year guarantee for all of our product components, if used in compliance with the Instructions for Use. It uses only the best EU outdoor fabrics. Our Umbrellas can be crafted in Acrylic (100%) outdoor fabric (300gr/sq. m), Teflon treated (10 year warranty) or PVC Preconstraint 302 or 502 by Ferrari (100% waterproof, pre-tensioned). It is also possible to choose Soltis, a modern micro aired fabric, as an option. Please our Color Samples guide for more information on the range of fabrics we offer.

WORKMANSHIP

Its bases are constructed of reinforced concrete finished with river grit. Alternatively, we can also develop plates for underground installation, wall-mounted brackets and other customized solutions. We use 'iroko' wood for the strong load bearing beams, which is the most suitable and durable wood for outdoor use. As an alternative, we also offer furnace painted steel or mirror polished stainless steel. The ribs can be made of solid wood (for canopies up to 4x4 m) or from reinforced and furnace painted aluminum. Stainless steel bolts anchor each umbrella's frame rib in order to ensure maximum strength and facilitate eventual substitution. All steel components are zinc plated before being furnace painted into the desired color.

CUSTOMIZATION

Every patio umbrella is hand crafted on request and therefore it is possible to customize every single component of our exclusive patio umbrellas. On request, we can construct triangular, trapezoidal, special dimension umbrellas and many other customized solutions! With over 30 years of experience and modern 3D projecting service We'll follow your desires and needs and to create a unique umbrella for your garden! Our aim to offer the widest range of outdoor umbrellas has led us to our new stainless steel line of umbrellas. These umbrellas are created to withstand the challenges of open sea conditions and therefore are intended for yachts and super yachts. The stainless steel line of umbrellas is crafted entirely in mirror polished AISI 316 stainless steel. The new double layer Split Solution umbrellas have double fabric stripes which enhance the shade and open up new design frontiers for our exclusive Heavy Duty Patio Umbrellas.

CENTRAL

Central Pole Umbrellas

FANETTE

BEALE

KYLE

COYNE

Fanette

Central Pole Umbrellas

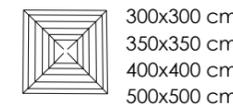

Standard

Optional

Looking for a traditional aesthetically refined model that is still practical and durable? The Fanette umbrella is your ideal solution. The lifted valve offers protection from sudden gusts of wind and creates its signature linear form. It is available in supported valve, lifted valve or Split Solution versions.

Beale

Central Pole Umbrellas

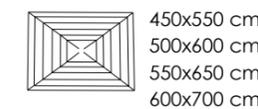

Standard

Optional

Classics are always in. The Beale is a classic central beam umbrella with updated features like its 12 reinforced aluminum splints and telescopic pole that allows it to open up to dimensions of 50 m2 under a single umbrella canopy. The telescopic system allows umbrella opening/closing without removing the chairs and tables underneath. Every rib is crafted from reinforced aluminum.

Kyle

Central Pole Umbrellas

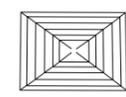

Standard

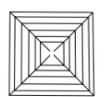

Optional

The future of outdoor umbrellas is Kyle. It is a tent-umbrella, a new concept that embodies the best qualities of a mountable tent but with the open/close ease of action of an umbrella. This even exempts it from the permits associated with permanent, gazebo and tent-like structures that need to be assembled and dismantled with each use. The sturdy construction, made entirely of zinc coated welded iron, allows the sheets to be closed using either Velcro or pulleys. This feature makes it the perfect solution for all seasons. Patented electric opening mechanism and its futuristic look are the two main attributes of Kyle tent-umbrellas.

Coyne

Central Pole Umbrellas

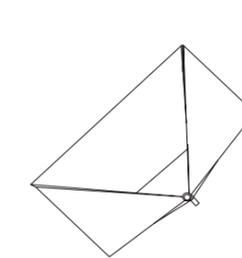

Standard

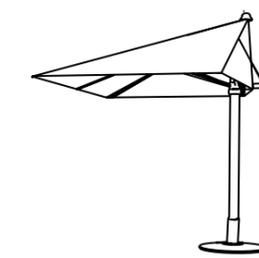

Optional

Coyne iak is our exclusive model inspired by the cafés and restaurants that are located in the narrow city streets of historic city centers such as Florence. The Coyne takes full advantage of your outdoor space. It has the smallest lateral footprint but allows a vast area of space to be covered. It is the perfect shelter for authentic narrow streets.

OFFSET

Offset Patio Umbrellas

ECHO

TELFORD

TELFORD STEEL

MERLIN

Echo

Offset Patio Umbrellas

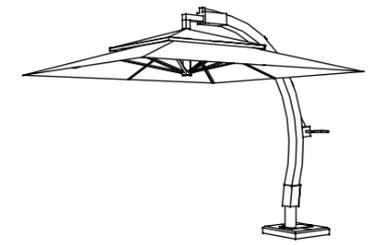

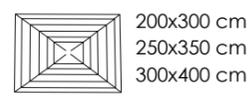

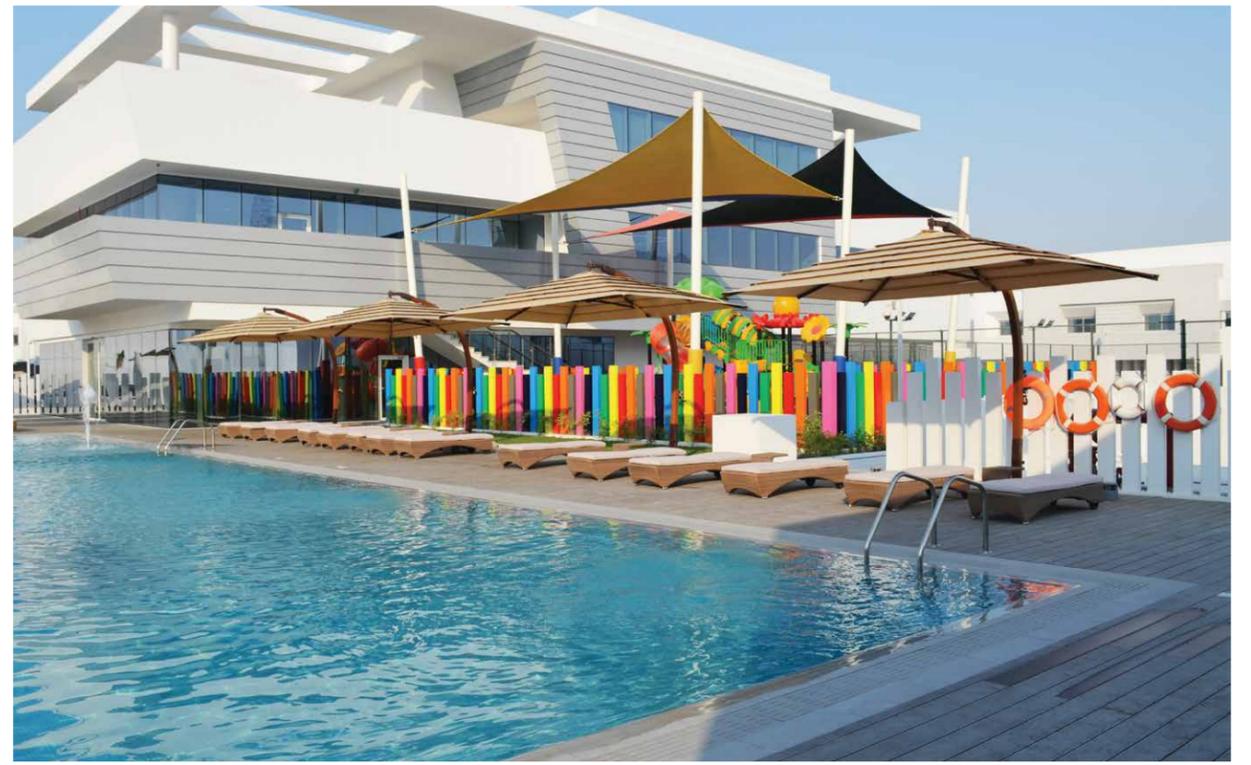

Standard

Optional

This model is an attractive refined solution that can cover large elegant spaces. The Echo is characterized by its departure from traditional portable joists. Our expert craftsmen make the arch entirely from iroko wood and its lamellar construction ensures maximum reliability and durability. Every single component is designed to enhance its weather resistance, but without compromising its aesthetic features.

Telford

Side Pole Umbrellas

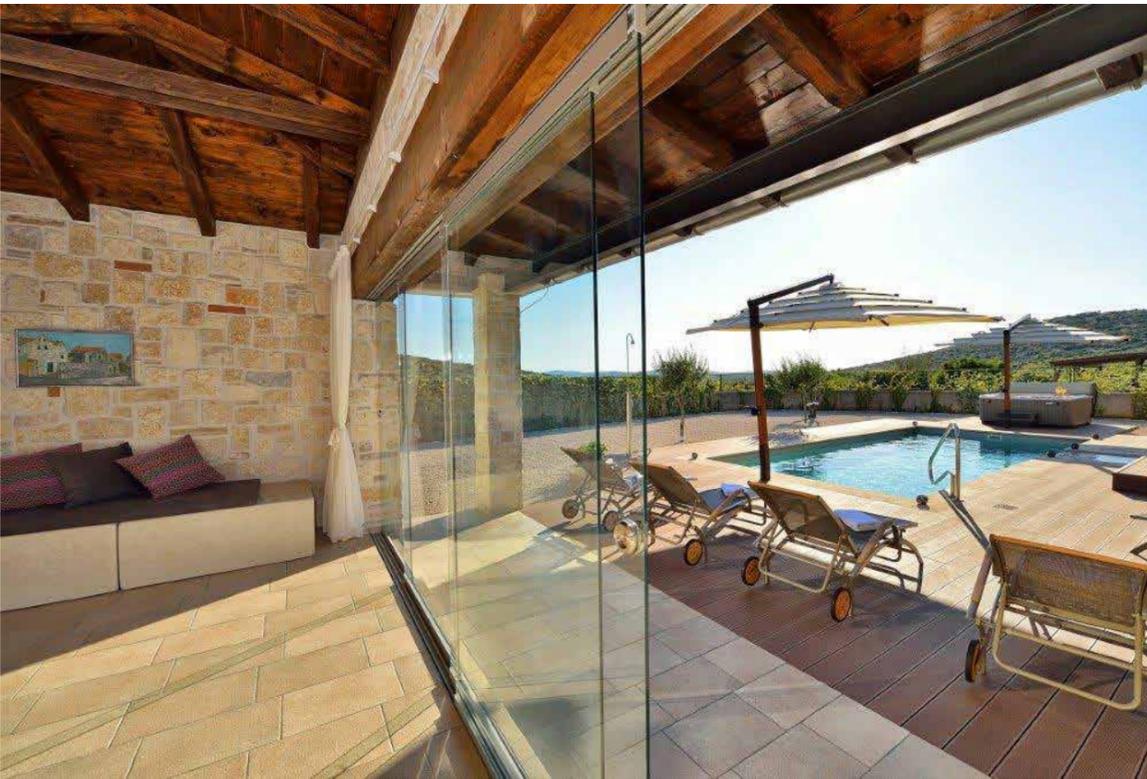

Standard

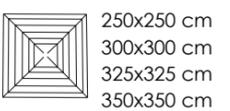

Optional

Thanks to its extreme versatility and ease of handling, The Telford is suitable for both private and professional use. It is a medium size umbrella with a lateral post. The vertical load bearing beam permits optimal usage of the area beneath, just as the possibility to rotate the base by 360° makes it possible to 'chase' the shade during the course of the day.

Telford Steel

Side Pole Umbrellas

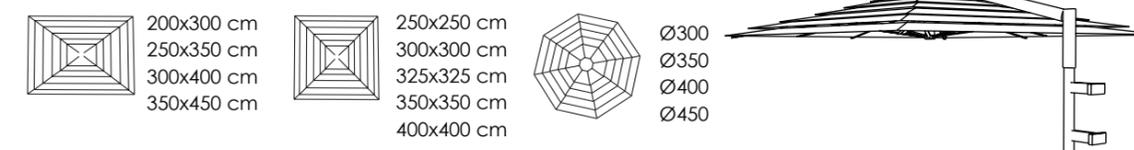

Standard

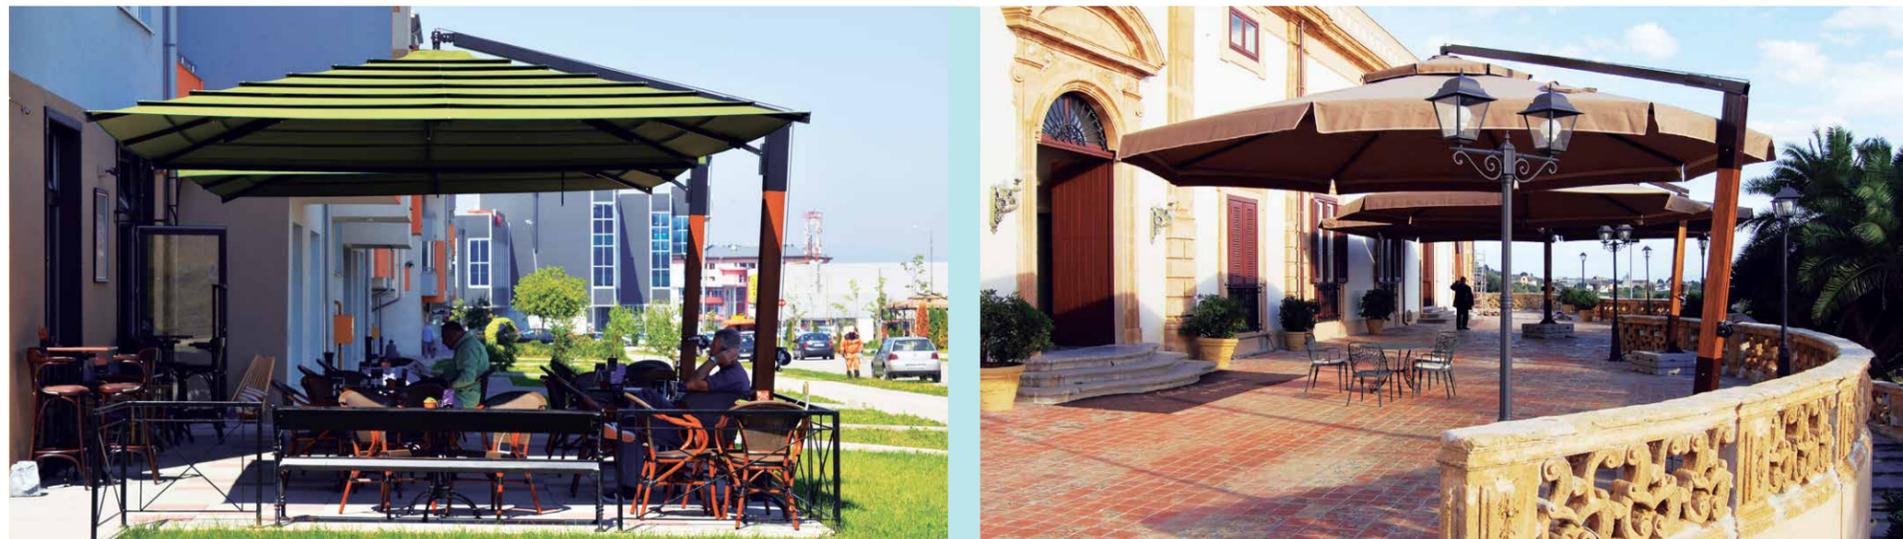

Optional

Clean lines and its 360° revolving design makes The Telford Steel versatile and suitable for all environments. It is an umbrella with a simple elegant design and mostly requested for terraces and platforms, where the traditional concrete base would limit the useful ground space. The mirror polished stainless steel version is suitable for installation on luxury yachts and modern buildings.

Merlin

Side Pole Umbrellas

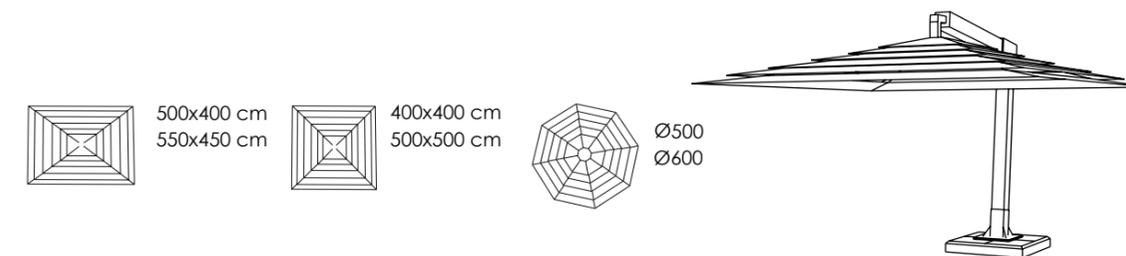

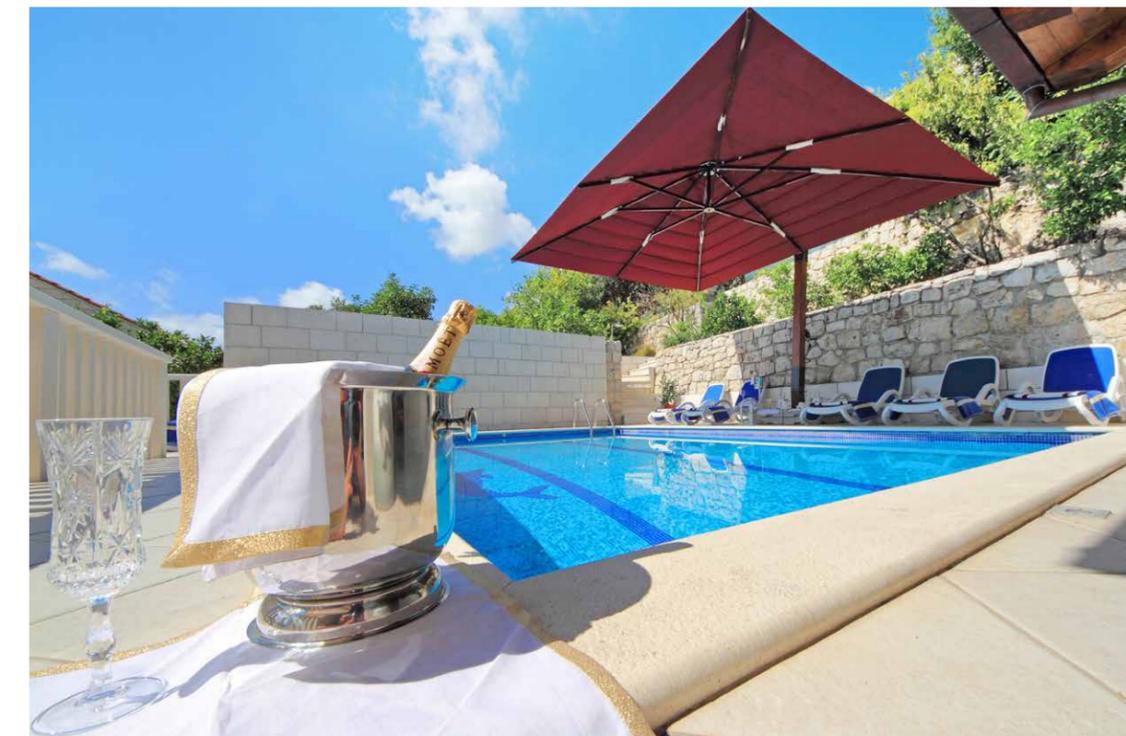

Standard

Optional

Are You living in the windy areas? If so, Cocoon recommends Split Solution canopies. The Merlin has a robust vertical 5.5x5.5 inch beam that can support large canopies and thus free space that would otherwise be occupied by a cement base. From this year, the Merlin can also be crafted with a 360° rotating base.

MULTIPLE

Multiple Canopy Umbrellas

GAUTHIER LATERALE

GAUTHIER CENTRALE

GAUTHIER STEEL

COSME

Gauthier Laterale

Multiple Umbrellas

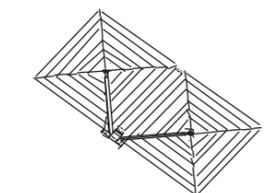

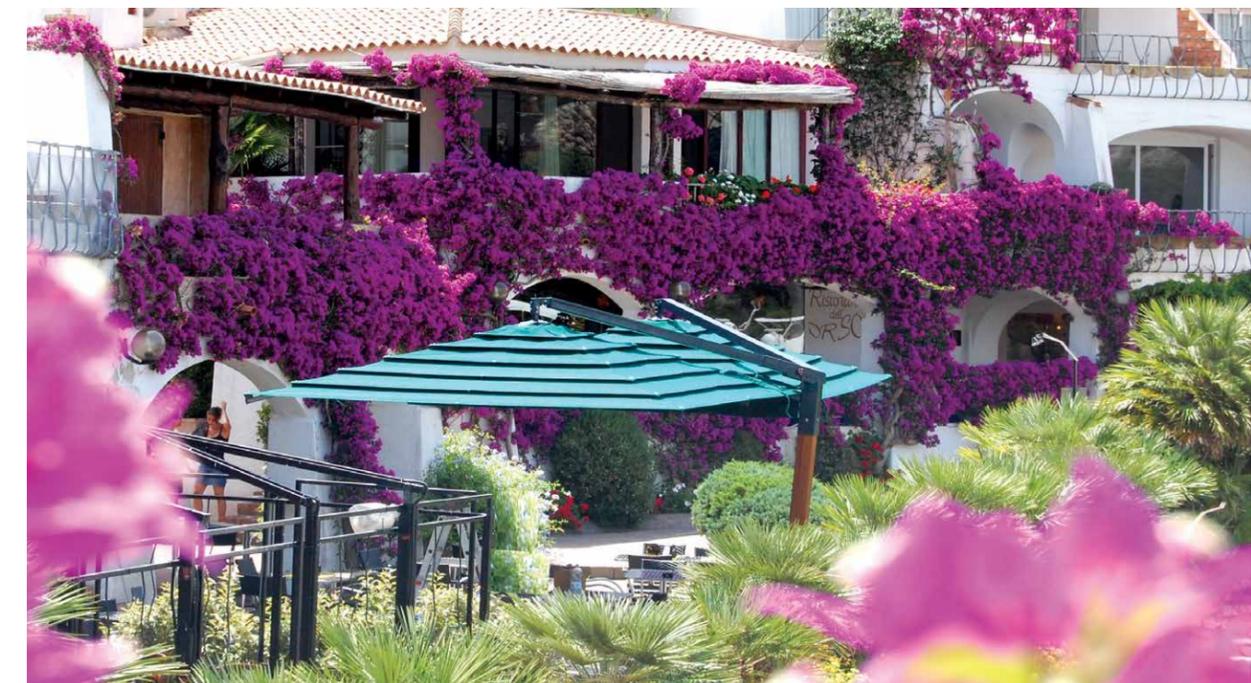

Standard

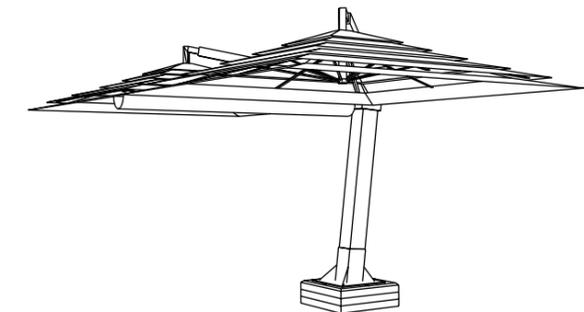

Optional

With its two inward leaning canopies that join on a central or lateral support, the Gauthier creates a large rectangular shadow that can cover a space of up to 5 x 10 m. The Gauthier can also connect with other modular systems, such as the Merlin and the Cosme, to cover even irregular spaces. The lateral support version is ideal for covering large tables or buffets.

- 325x650 cm
- 350x700 cm
- 400x800 cm
- 450x900 cm
- 500x1000 cm

Gauthier Steel

Multiple Umbrellas

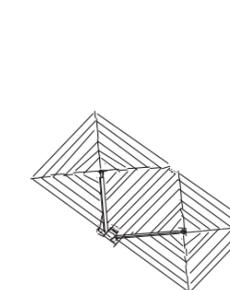

Standard

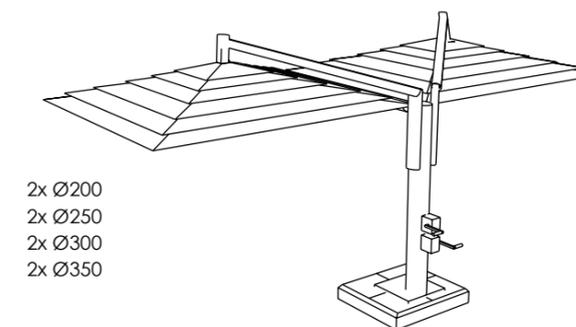

Optional

Gauthier Steel is part of the steel line and represents an evolution of the Gauthier Patio Umbrella. The two umbrellas can be oriented and moved when closed to 'follow' the shade during the day. The entire structure is made of thick galvanized steel and painted in the selected color. The Gauthier Steel has an innovative but simple design. The finely polished AISI 316 stainless steel version of this double patio umbrella is suitable for most exclusive modern environments and luxury yachts.

- 250x500 cm 2x Ø200
- 300x600 cm 2x Ø250
- 325x650 cm 2x Ø300
- 350x700 cm 2x Ø350

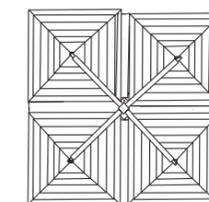

Cosme
Multiple Umbrellas

The Cosme is ideal for covering large square spaces and designed to prevent rainwater from seeping between the canopies by use of a special drip-guard linkage system. It has four square canopies that each expand to 16.5ft and all together can cover an area of up to 1,089 square feet. The structure commands attention with the finest most sought after trims on the market today.

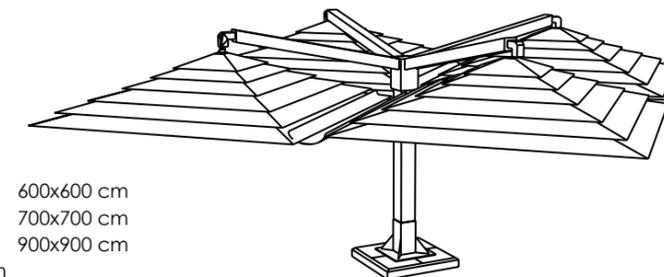

Standard

Optional

- 500x500 cm
- 650x650 cm
- 800x800 cm
- 1000x1000 cm
- 600x600 cm
- 700x700 cm
- 900x900 cm

Fabrics Choice

The fabric is the most important part of any umbrella. This is why we offer only the best outdoor fabrics available on the market today.

ACRYLIC 100%, 300gr/sqm, made in Spain

Acrylic fabric (100%) is non-decomposable and anti bacterial with a 10 year warranty. The Teflon-treated fabric is water and dirt resistant.

PVC PRECONTRAIT, 590gr/sqm, made in France

100% waterproof, pre-tensioned high dimensional stability, UV resistant, fireproof (2nd class), easy to maintain, durable and tear resistant.

Exclusive Précontraint Serge Ferrari® technology

Patented worldwide, Précontraint Serge Ferrari® technology involves keeping the composite under tension throughout the manufacturing cycle.

Surface treatment

High tenacity polyester base cloth

GARANTEE
Serge Ferrari

MICRO AIRED SOLTIS, 400gr/sqm

Outward visibility, micro-ventilated, light, durable and 100% recyclable.

Finishing

Ribbon :

The final customization touch is the ribbon color, which is available in all listed fabric colors.

Metal parts :

All metal parts are zinc plated and furnace painted in the following RAL colors (choice):*

Ribs (20x40x2mm) :

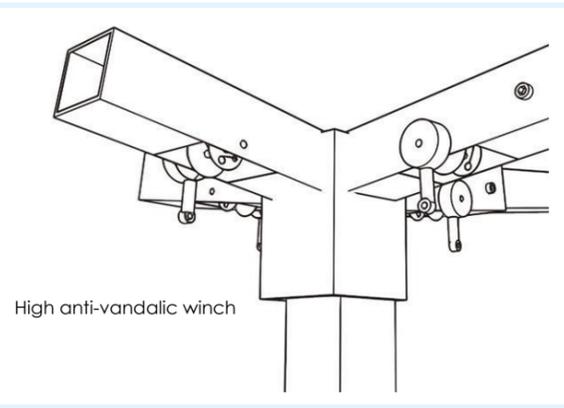

For all umbrellas up to 4x4 m with a Raised Valve the ribs can be wooden or aluminum. All larger umbrellas and Split Solution umbrellas have ribs that are made only of aluminum. The available colors are:

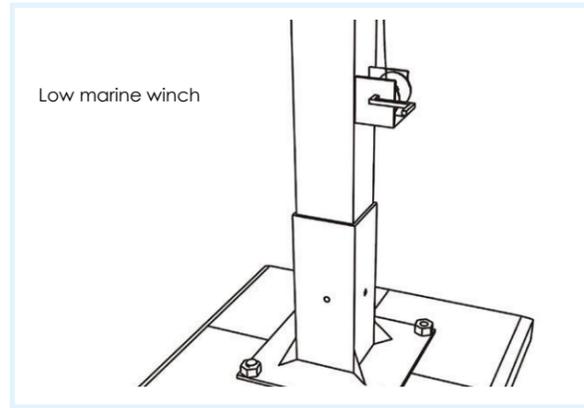

Umbrella Type	Dimension	Pole Material choice			
		Iroko	Iron	Stainless Steel	Aluminum
Fanette, Coyne	Ø 50-60mm		✓		✓
Beale, Kyle	Ø 13cm		✓	✓	
Telford	9x9cm	✓	✓	✓	
Echo	9x9cm	✓			
Telford Steel	Ø 60 - 70mm		✓	✓	
Gauthier Steel	Ø 13cm or 14x14cm		✓	✓	
Merlin, Gauthier, Cosme	14x14cm	✓	✓		

All other colors are available with an extra charge.

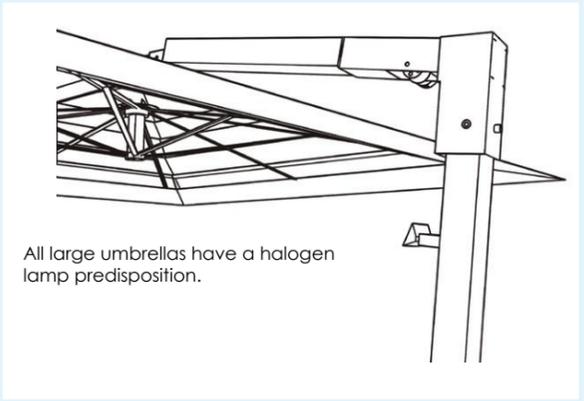

Extras

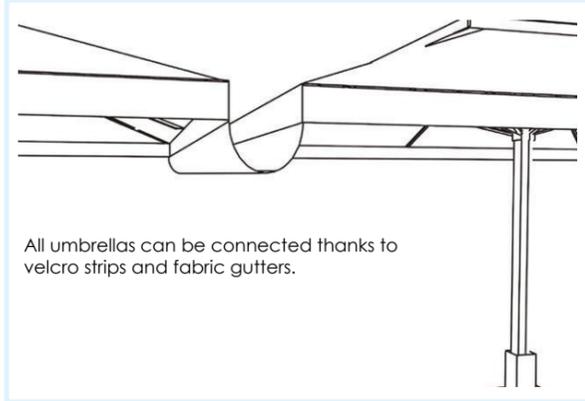

High anti-vandalic winch

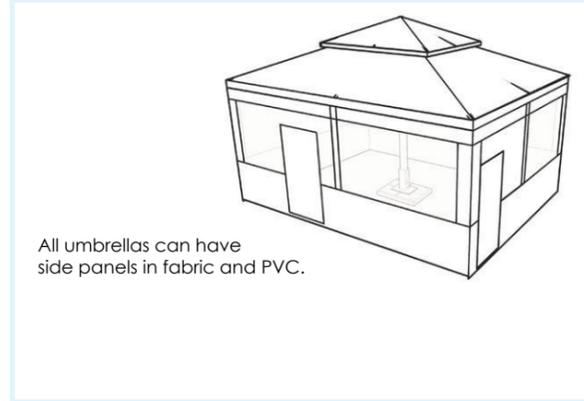

Low marine winch

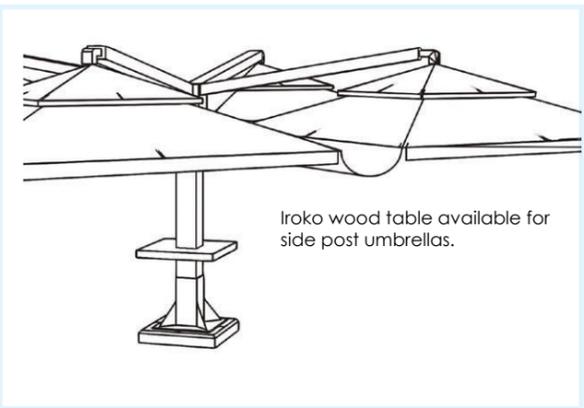

All large umbrellas have a halogen lamp predisposition.

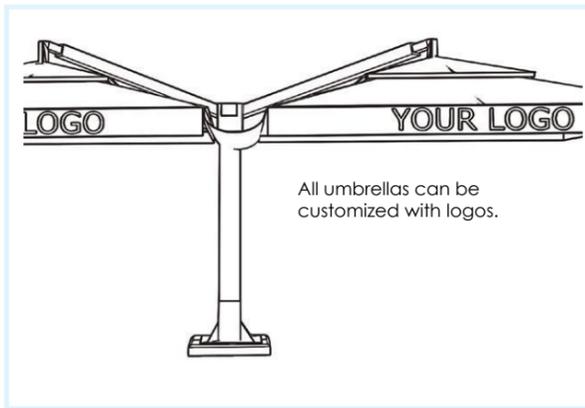

All umbrellas can be connected thanks to velcro strips and fabric gutters.

All umbrellas can have side panels in fabric and PVC.

Iroko wood table available for side post umbrellas.

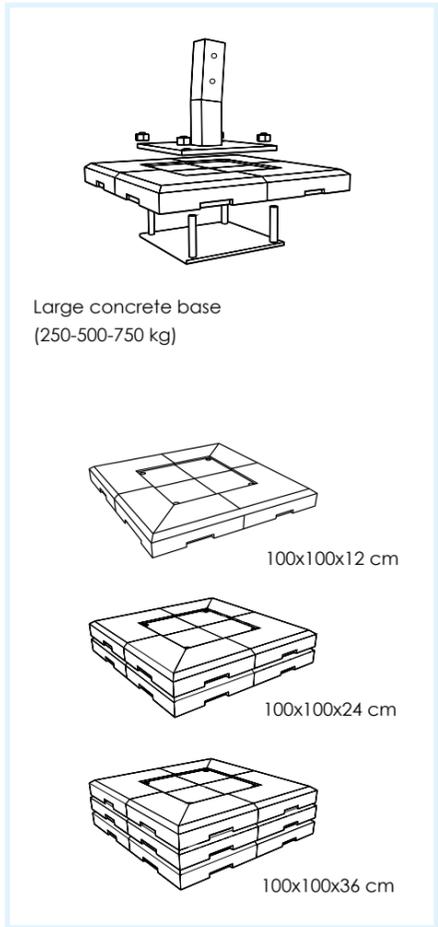

All umbrellas can be customized with logos.

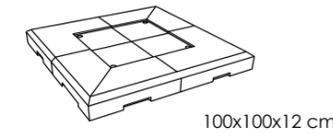

All Split Solution umbrellas can be made with double fabric.
