360° Rotation

180° Rotation

Base included

Ground anchor

Wall bracket

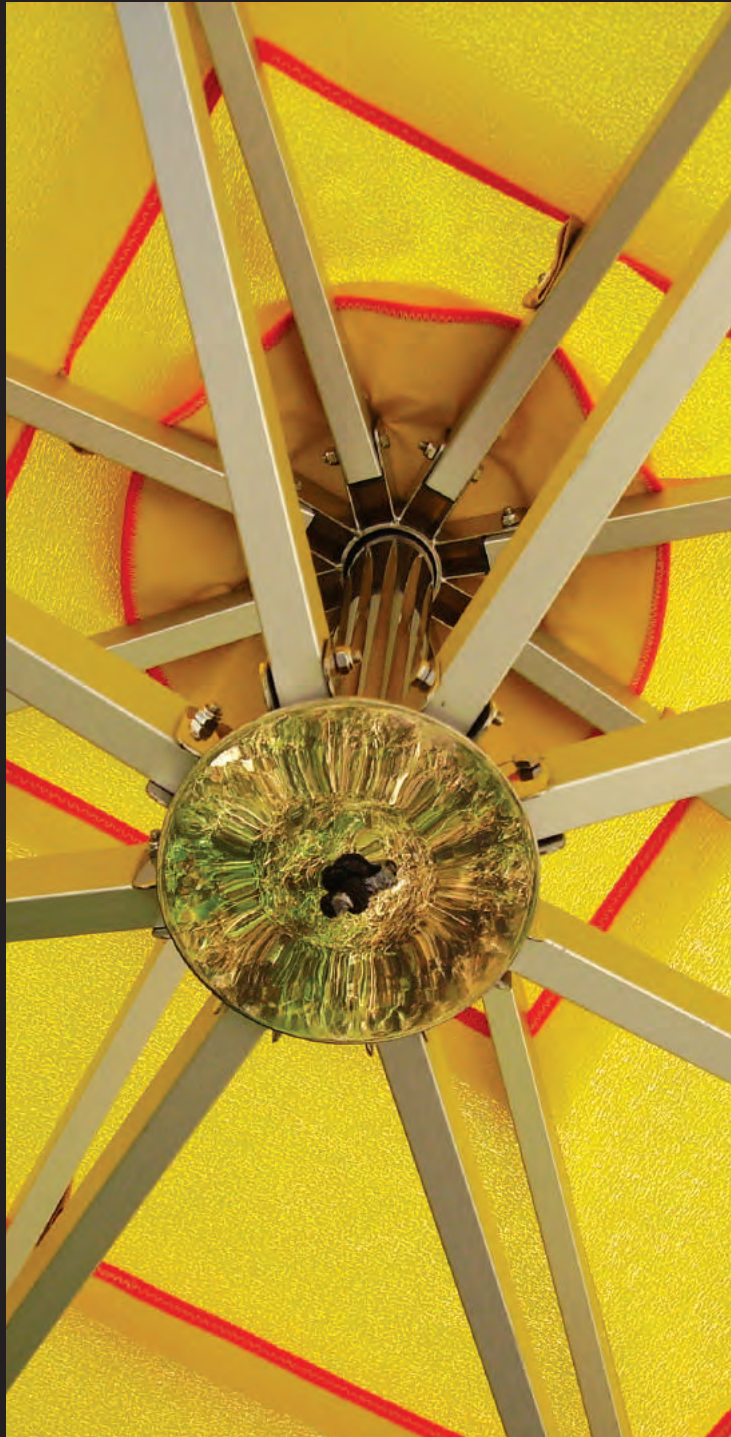

Strong wind resistance

FANETTE • BEALE • KYLE • COYNE

## Central Pole Patio Umbrellas

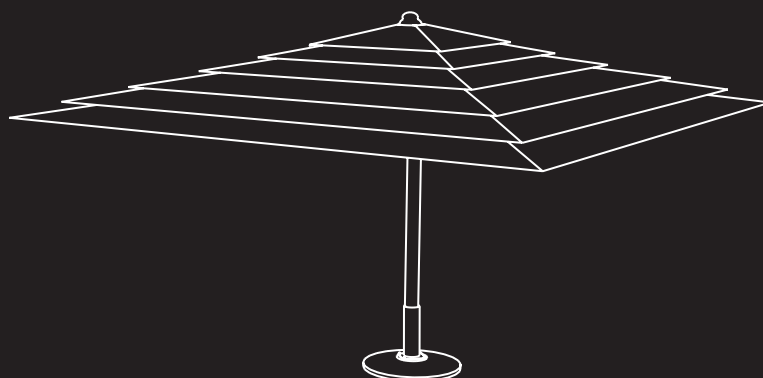

# Fanette

If you are looking for a traditional aesthetically refined model that is still practical and durable then the Fanette umbrella is your ideal solution. The lifted valve offers protection from sudden gusts of wind and creates its signature linear form. It is available in supported valve, lifted valve or Split Solution versions.

Ø400

# Beale

The Beale is a classic central beam umbrella with updated features like its 12 reinforced aluminum splints and telescopic pole that allows it to open up to dimensions of 50 m2 under a single umbrella canopy. The telescopic system allows umbrella opening/closing without removing the chairs and tables underneath. Every rib is crafted from reinforced aluminum.

Ø750 Ø800

# Kyle

The **Kyle** is a tent-umbrella, a new concept that embodies the best qualities of a mountable tent but with the open/close easy of action of an umbrella. This even exempts it from the permits associated with permanent, gazebo and tent-like structures that need to be assembled and dismantled with each use. The sturdy construction, made entirely of zinc coated welded iron, allows the sheets to be closed using either Velcro or pulleys. This feature makes it the perfect solution for all seasons. These attributes, along with its patented electric opening mechanism and futuristic look, have earned the Kite recognition as the “future of outdoor umbrellas”.

400x400 cm	450x450 cm
500x500 cm	600x600 cm

# Coyne

Our Coyne model is an Edengarden exclusive developed specifically for cafés and restaurants that line the narrow city streets in historic city centers such as Florence. The Coyne takes full advantage of your outdoor space. It has the smallest lateral footprint but allows a vast area of space to be covered, the perfect solution for those who need to shelter long narrow spaces.

## Side Post Patio Umbrellas

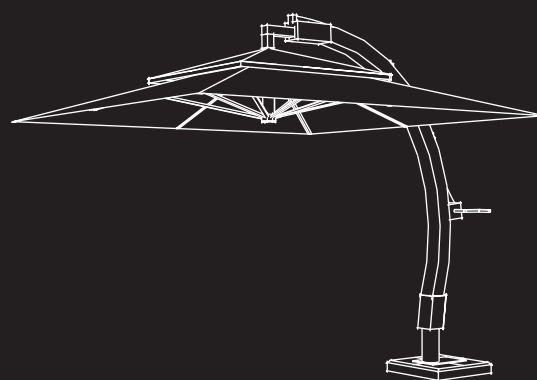

# Echo

The **Echo** is characterized by its departure from traditional portable joists. This model is an attractive refined solution that can cover large elegant spaces. Our expert craftsmen make the arch entirely from iroko wood and its lamellar construction ensures maximum reliability and durability. Every single component is designed to enhance its weather resistance, but without compromising its aesthetic features.

# Telford

The **Telford** is a medium size umbrella with a lateral post. Thanks to its extreme versatility and ease of handling, it is suitable for both private and professional use. The vertical load bearing beam permits optimal usage of the area beneath, just as the possibility to rotate the base by 360° makes it possible to 'chase' the shade during the course of the day.

# Telford Steel

Telford Steel is an umbrella with a simple elegant design. The clean lines and 360° revolving design make it versatile and suitable for all environments. It is mostly requested for terraces and platforms, where the traditional concrete base would limit the useful ground space. The mirror polished stainless steel version is suitable for installation on luxury yachts and modern buildings.

# Merlin

The Merlin has a robust vertical 5.5x5.5 inch beam that can support large canopies and thus free space that would otherwise be occupied by a cement base. EdenGarden recommends Split Solution canopies for usage in windy areas. From this year, the Merlin can also be crafted with a 360° rotating base.

## Multiple Canopy Patio Umbrellas

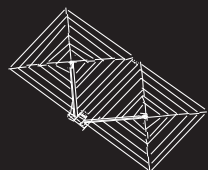

# Gauthier Laterale

With its two inward leaning canopies that join on a central or lateral support the Gauthier creates a large rectangular shadow that can cover a space of up to 16.5 x 33 ft. The Gauthier can also connect with other modular systems, such as the Merlin and the Cosme to cover even irregular spaces. The lateral support version is ideal for covering large tables or buffets.

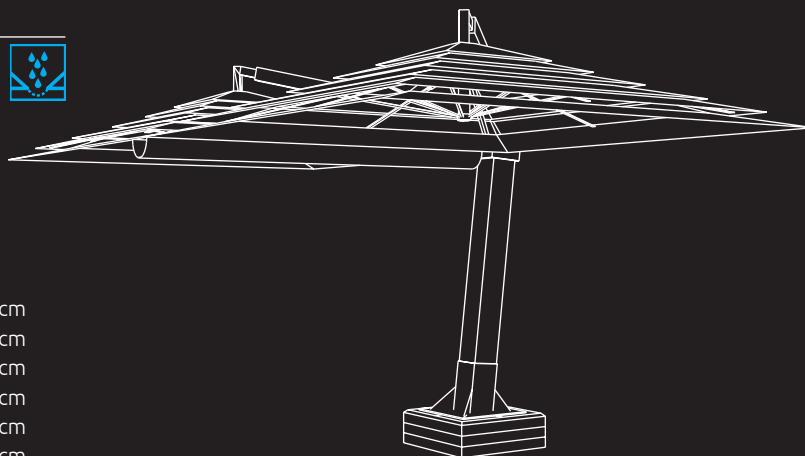

## Standard

## Optional

300x600 cm  
325x650 cm  
350x700 cm  
400x800 cm  
450x900 cm  
500x1000 cm

# Gauthier Steel

Gauthier Steel is part of the steel line and represents an evolution of the Gauthier Patio Umbrella. The two umbrellas can be oriented and moved when closed to 'follow' the shade during the day. The entire structure is made of thick galvanized steel and painted in the selected color. The Gauthier Steel has an innovative but simple design. The finely polished AISI 316 stainless steel version of this double patio umbrella is suitable for most exclusive modern environments and luxury yachts.

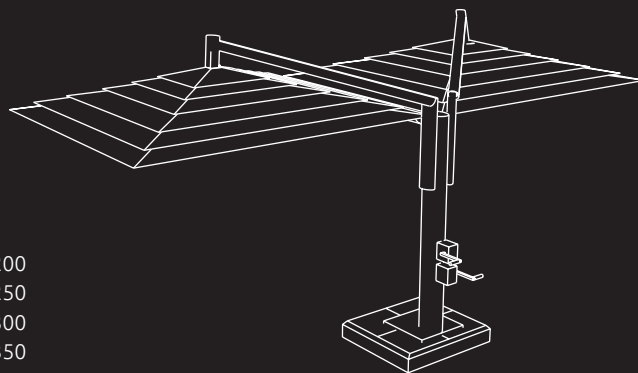

## Standard

## Optional

250x500 cm	2x Ø200
300x600 cm	2x Ø250
325x650 cm	2x Ø300
350x700 cm	2x Ø350

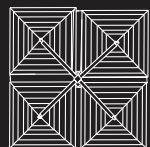

# Cosme

The Cosme has four square canopies that each expand to 16.5ft and all together can cover an area of up to 1,089 square feet. The structure commands attention with the finest most sought after trims on the market today. The Cosme is ideal for covering large square spaces and designed to prevent rainwater from seeping between the canopies by use of a special drip-guard linkage system.

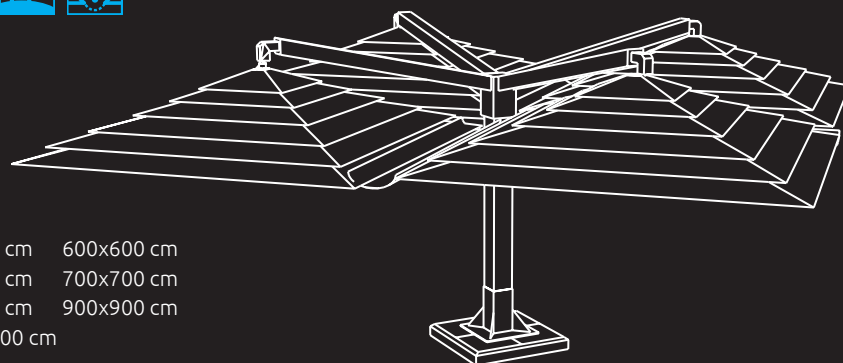

## Standard

## Optional

500x500 cm	600x600 cm
650x650 cm	700x700 cm
800x800 cm	900x900 cm
1000x1000 cm	

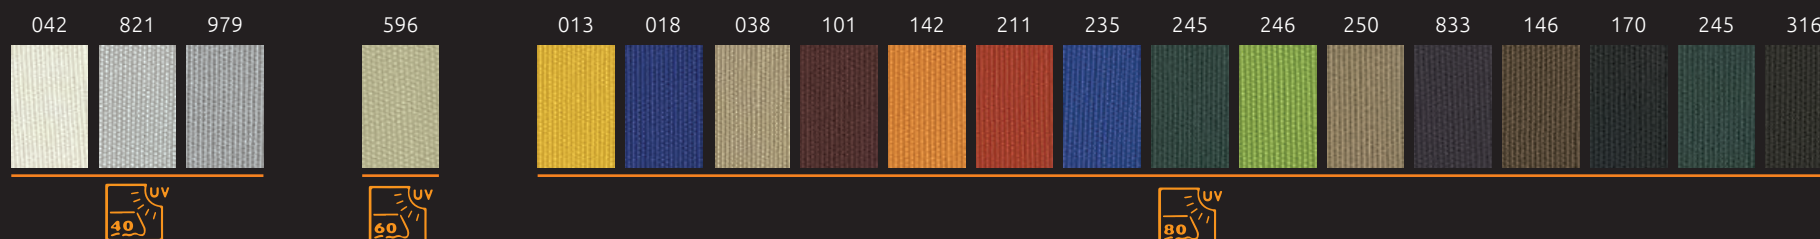

# Fabrics Choice

The fabric is the most important part of any umbrella. This is why at EdenGarden we offer only the best outdoor fabrics available on the market today.

## ACRYLIC 100%, 300gr/sqm, made in Spain

Acrylic fabric (100%) is non-decomposable and anti bacterial with a 10 year warranty. The Teflon-treated fabric is water and dirt resistant.

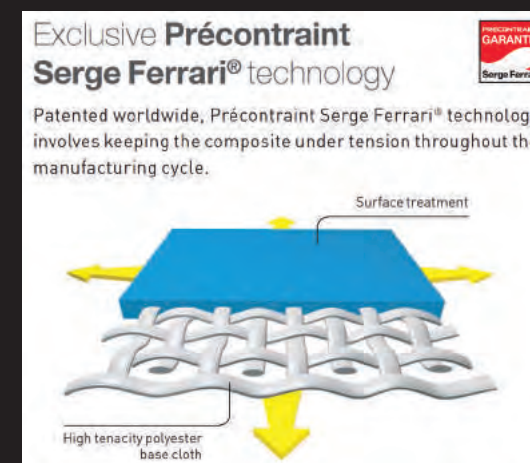

## PVC Precontraint, 590gr/sqm, made in France

100% waterproof, pre-tensioned high dimensional stability, UV resistant, fireproof (2nd class), easy to maintain, durable and tear resistant.

## MICRO AIRED SOLTIS, 400gr/sqm

Outward visibility, micro-ventilated, light, durable and 100% recyclable.

# Finishing

## Ribbon

The final customization touch is the ribbon color, which is available in all listed fabric colors.

## Metal parts vi:

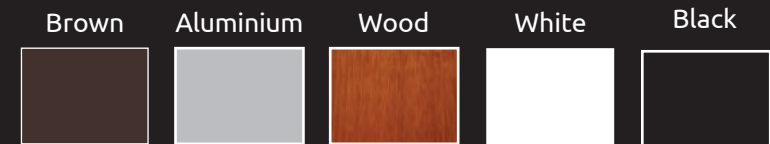

All metal parts are zinc plated and furnace painted in the following RAL colors (choice):

## Ribs (20x40x2mm)

For all umbrellas up to 4x4 m with a Raised Valve the ribs can be wooden or aluminum. All larger umbrellas and Split Solution umbrellas have ribs that are made only of aluminum. The available colors are:

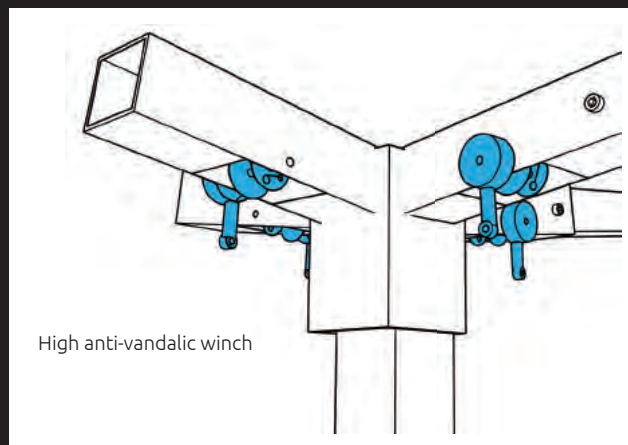

*All other colors are available with an extra charge.*
